

COWDEN SUPPORT PROGRAM

Schedule & Instructions

NutraMedix 

Providing Quality Natural Products Since 1993

COWDEN SUPPORT PROGRAM INSTRUCTIONS

The Cowden Support Program (CSP) is a protocol utilizing 14 different Nutramedix products taken rotationally. These products are prepackaged in individual monthly sets which save 34% off purchasing the products separately. Visit www.nutramedix.com to view the monthly CSP packages.

IMPORTANT! READ THIS BEFORE STARTING!

The Cowden Support Program (CSP) is not effective unless you are drinking 3 quarts (liters) of water throughout the day.

Drinking 2-3 ounces (60-90ml) of pure drinking water every 10-15 minutes during all waking hours causes most of the water to go into the cells, hydrate the cells, mobilize toxins out of the cells and ultimately mobilize toxins out of the body (mostly through urine & feces). Drinking large quantities of water even a few times per day does not efficiently hydrate the body nor does it mobilize toxins out of the body.

Black tea, green tea, coffee, sodas & alcoholic drinks are not hydrating. Vegetable and some fruit juices (lemon & lime) are hydrating. While most herbal teas are hydrating, when too much sugar is added to herbal teas, they can be dehydrating rather than hydrating; therefore, the best choice of sweeteners for herbal teas would be Nutramedix **STEVIA**.

- » Shake the liquid products well before each use.
- » To ensure the proper dosage, dispense drops by holding the dropper at a 45 degree angle.
- » Mix the liquid products, of each dose, together in a glass, porcelain or paper cup (not Styrofoam, plastic or metal) then add at least 4 oz. (120ml) of water. Do not use distilled, sparkling, or reverse-osmosis water. Let sit for at least 1 minute before drinking (longer is fine - up to 2 days).
- » Check the "Done:" box on the Program Schedule sheets after taking each dose. Background color changes on the schedule represent a change from what products were taken at the same time the previous day.
- » If HERX reaction is suspected (feeling worse in any way than you were before) take 20 drops of **BURBUR-PINELLA** in 2 oz. (60 ml) of clean water every 10 minutes for up to 2 hours and then resume the program. The easiest way to do this is add 4 droppers full of **BURBUR-PINELLA** to a bottle of water and sip it over a two hour period, repeating it as many times as necessary until feeling better. If the symptoms still exist by the time of the next scheduled dose of microbial defense products* then skip that one dose. If this happens more than once then consider increasing the dosage every 1 - 2 days instead of every dose. **NOTE: Extra product may be required for this use.**

***BANDEROL, CUMANDA, ENULA, HOUTTUYNIA, MORA, SAMENTO, STEVIA, and TAKUNA**

COWDEN SUPPORT PROGRAM INSTRUCTIONS

- » Avoid all known food allergies. If you are unaware of any food allergies you may have, we recommend avoiding all common food allergens – all cow milk and cow cheese products, all wheat products, all corn products (corn oil, corn starch, and corn syrup), peanuts and peanut oil (most oriental foods), soy products (it is a common filler in fast food restaurants), black pepper, white pepper, sugar (may substitute Nutramedix **STEVIA**).
- » **WARNING:** Fibers and most products that act as binders can be taken at least 30 minutes after a dose of any product on the CSP and at least 4 hours before a dose of the CSP products. Certain binders such as Activated Charcoal, Calcium Bentonite Clay, and Cholestyramine (Questran) should be taken **ONLY** as absolutely necessary to resolve a Herxheimer reaction.
- » Some people choose to use additional supplements while taking the Cowden Support Program (CSP). It is best to take the Nutramedix products as indicated on the dosing schedule and any additional supplements after meals and at least 1 hour after the herbals.
- » **BARBERRY, CHANCA PIEDRA, EZOV, MAPALO, NONI, QUINA, and TANGARANA** (since these other Nutramedix products, not part of this program, all have *microbial defense* properties) as well as ALL other pharmaceutical antibiotics and herbal antimicrobial agents from other companies, can be taken daily from day 4 to day 78 of the Cowden Support Program. After day 78, they **MUST ALL BE STOPPED** for at least the same 36 hour period every 2 weeks when the other microbial defense herbs are stopped (pharmaceutical antibiotics should be stopped **AT LEAST 12 hours** before the Nutramedix microbial defense products* are stopped).
- » If you have received a long course or multiple short courses of antibiotics, then it is best to avoid ALL sugars and ALL high glycemic index foods from day 18 to day 78.
- » **OPTIONAL NUTRAMEDIX PRODUCTS:** For extreme fatigue, 20 drops of **ADRENAL** can be taken, twice daily 10 - 15 min. before breakfast and lunch for at least 4 months. For stress and difficulty sleeping, 15 drops of **AMANTILLA** can be taken as needed throughout the day, after meals and 30 drops at bedtime (repeat during the night as needed).
- » **IMPORTANT:** Reorder products for your next month at least 2 weeks in advance to ensure no interruption of the program.
- » Dr. Cowden recommends following this program until feeling well, then continue the program for 2 more months. If one chooses to follow the program for more than 9 months, then Dr. Cowden recommends repeating **months 7, 8, and 9** until they feel well, then continue the program for 2 more months.

***BANDEROL, CUMANDA, ENULA, HOUTTUYNIA, MORA, SAMENTO, STEVIA, and TAKUNA**
